

**"Rising greenhouse gas pollution from the burning of coal, oil and gas is worsening extreme weather and putting people in danger."**

**Greg Mullins AO  
Former Commissioner Fire and Rescue  
10 April 2019**

**"Climate change remains the most significant threat to our security, and we must now act accordingly with the necessary scale and speed of action."**

**Admiral Chris Barrie  
Former Chief of the Defence Force  
6 December 2021**

**"While Australia fights for coal, the Pacific fights for its survival"**

Anote Tong, former president of the Republic of Kiribati

1 March 2022

## **Make your vote count**

We are all being impacted by climate change through extreme weather events. This election matters because the window of time to act for our climate is closing. Vote for candidates who offer the strongest action on climate.

We are local citizens working for action on the most important issue of our time. We are unfunded and unaffiliated with any organisation and have 800 local supporters who receive our monthly e-newsletter.
